go to

ohmyz.sh

do as they say

next:

Got it. If Oh My Zsh isn't providing autocomplete, let's try enabling or fixing it. Here's a step-by-step approach:

1. **Check Plugins**:

   Ensure `zsh-completions` is enabled in your `.zshrc` file. Open it with a text editor, for example:

   ```bash
   nano ~/.zshrc
   ```

   Then ensure the `plugins` line includes `zsh-completions`:

   ```bash
   plugins=(git zsh-completions)
   ```

2. **Install `zsh-completions`**:

   If you don't have `zsh-completions` installed, you can install it:

   ```bash
   git clone https://github.com/zsh-users/zsh-completions ${ZSH_CUSTOM:-~/.oh-my-zsh/custom}/plugins/zsh-completions
   ```

3. **Enable Autocomplete Suggestions**:

   Consider installing the `zsh-autosuggestions` plugin for more advanced auto-completion:

```bash
git clone https://github.com/zsh-users/zsh-autosuggestions ${ZSH_CUSTOM:-~/.oh-my-zsh/custom}/plugins/zsh-autosuggestions
```

Add it to the plugins array in your `.zshrc` file:

```bash
plugins=(git zsh-completions zsh-autosuggestions)
```

4. **Reload `.zshrc`**:

After making the changes, reload your `.zshrc` file:

```bash
source ~/.zshrc
```

These steps should enable autocomplete features in Oh My Zsh. Give it a try and let me know if it works! If you have any more questions or need further assistance, I'm here to help.
